SCAFFOLDING SERVICES

Scaffolding is a temporary structure that is typically made from metal poles and wood planks and used to support construction workers, inspectors, cleaners, and others who need to work at height. A scaffold, also called scaffolding or staging, is a temporary structure that allows people to stand on a stable platform for work at height or in hard-to-reach places. These temporary structures are often used in constructing, maintaining, or repairing buildings, bridges, and other man-made structures by supporting work crews and materials.

OUR Clients

We undertake projects in scaffolding, welding, blasting/painting, electrical, mechanical, instrumentation. In India we have been providing our services construction, shipyard, oil & gas sectors ensuring 100% customer satisfaction.
